

LL.M. in Energy and Environmental Law

The LL.M. program in Energy and Environmental Law at UConn School of Law engages students and develops their expertise in global energy needs, climate change, renewable energy policy, environmental policy and land use.

Through the Center for Energy & Environmental Law, UConn Law students will have the opportunity to move beyond the classroom to practice-based learning opportunities, including:

- Externships with state agencies, law firms, energy and environmental corporations, and regulated utilities;
- The LL.M.+ program in DC , which places students at such federal agencies as the Environmental Protection Agency and the Department of Energy; and
- Applied research in a range of areas.

UConn Law students will have opportunities to attend lectures and events with science and research departments at UConn's main campus in Storrs and at other institutions. The flexible and unique program will prepare students to integrate energy and environmental disciplines into their work, making them singularly valuable in their chosen professional fields.

UConn School of Law is in the residential West End of Hartford, Connecticut, on a lovely Gothic-style campus that is listed on the U.S. National Register of Historic Places. Cultural and recreational opportunities abound in the area, which is just two hours from New York and Boston.

More information is available at law.uconn.edu/llm-eel

For further inquiries or to arrange a campus visit, please email llm@uconn.edu or call 1-860-570-5284.

"The program here is actually headed up by a professor who I think knows every single person in New England, and probably most of them outside, who deal with E & E. He is a member of a very good team here of people who look at E & E holistically."

Jonathan Anderson
JD Student
